OSZ - Open Space Zone

Introduction

The purpose of the Open Space Zone is to provide for areas used predominantly for a range of passive and active recreational activities, along with limited associated facilities and structures.

The zone includes parks, playgrounds and informal recreation spaces in a range of sizes, locations, settings and communities. The zone also includes existing District Council owned cemeteries, which function as memorial gardens and have a park-like setting.

The zone may include items such as play equipment, outdoor furniture, ornamental landscaping, memorials, historic heritage items, and various other public amenities, and may also include ecological linkage reserves.

The provisions in this chapter have been justified where required by a s77J qualifying matter assessment contained in the relevant section 32 evaluation report under the RMA.⁴²

The provisions in this chapter are consistent with the matters in Part 2 - District Wide Matters - Strategic Directions and give effect to matters in Part 2 - District Wide Matters - Urban Form and Development. As well as the provisions in this chapter, district wide chapter provisions will also apply where relevant.

Objectives	
OSZ-O1	 Predominant character, amenity values, role and function of the Open Space Zone An Open Space Zone where the predominant character, amenity values, role and function of the zone is characterised by: parks, playgrounds and informal recreation spaces of varying size and type in a range of locations, settings and communities, that complement and maintain amenity values; compatible passive and active recreation activities; limited buildings and other structures; cemeteries functioning as memorial gardens with a park-like setting; and park management activities and park management facilities.
Policies	
OSZ-P1	Activities and structures in the Open Space Zone The predominant character, amenity values, role and function of the zone is maintained and, where possible, enhanced, by enabling or managing activities and structures in the zone in a manner consistent with OSRZ-P1 and OSRZ-P2, with regard to achieving the outcomes sought in OSRZ-O1 and OSRZ-O2 and in particular OSZ-O1.

Built Form Standards

OSZ-BFS1 Coverage

 Unless otherwise specified in the activity standards, with the exception of a cemetery, the maximum: a. GFA of a single building; b. percentage of a site covered by all buildings; and c. percentage of a site covered by impervious surface (excluding walk ways, tracks, cycle ways, hard/artificial playing and safety surfaces, and buildings); shall be as specified in Table OSZ-1 below. OSZ-BFS3 Height in rel	ation to boundary		
 1. Where an internal boundary adjoins residential zones, Special Purpose Zone (Kāinga Nohoanga) or Special Purpose Zone (Pines Beach and Kairaki Regeneration), the height in relation to boundary for the adjoining zone shall apply, and where specified structures shall not project beyond a building envelope defined by recession planes measuring 2.5m from ground level above any site boundary in accordance with the diagrams in Appendix APP3, except for the following: a. flagpoles; b. lightning rods, chimneys, ventilation shafts, solar heating devices, roof water tanks, lift and stair shafts; 		RDIS Matters of discretion ar	mpliance not achieved: e restricted to: t in relation to boundary

 c. decorative features such as steeples, towers and finials; d. for buildings on adjoining sites which share a common wall, the height in relation to boundary requirement shall not apply along that part of the internal boundary covered by such a wall; and e. where the land immediately beyond the site boundary forms part of any rail corridor, drainage reserve, or accessway (whether serving the site or not), the boundary for the rail corridor, drainage reserve, or accessway furthest from the site boundary for the purpose of defining the origin of the recession plane, provided this deemed site boundary is no further than 6m from the site boundary; 2. Provided that none of the structures listed in (c) to (e) has a horizontal dimension of over 3m along the line formed where the structure meets the recession plane as measured parallel to the relevant boundary.
