WAIMAKARIRI DISTRICT COUNCIL NORTHERN PEGASUS BAY BYLAW 2016 (amended 2023)

PREAMBLE

This preamble is intended to explain the bylaw's context and general intention.

A number of agencies own or manage land within or adjacent to the area covered by this bylaw. These are the Waimakariri District Council, Environment Canterbury, the Department of Conservation, Land Information NZ Toitū Te Whenua and Te Kōhaka o Tūhaitara Trust.

The proposed bylaw seeks to address the following key issues:

- Health and safety of beach users.
- Conflicts between incompatible recreation activities.
- The impact of offensive behaviour on other beach users' enjoyment or use of the beach.
- Impacts of recreation use on the dune systems and on the wildlife and vegetation of the estuaries and lagoons.
- Disturbance and destruction of foreshore habitats.

Legislative Context and Links to other Documents

The management of the coastal environment is legislated by various Acts. These include, but are not limited to, the *Resource Management Act 1991*, *Ngāi Tahu Claims Settlement Act 1998*, *Marine and Coastal Area (Tukutai Moana) Act 2011*, *Local Government Act 2002*, *Land Transport Act 1998*, *Reserves Act 1977*, *Conservation Act 1987*, *Wildlife Act 1953*, *Marine Mammals Protection Act 1978*, *Dog Control Act 1996* Fire and Emergency NZ Act 2017 and *Freedom Camping Act 2011*.

Additional documents that have been taken into consideration in developing this bylaw include the following:

- Treaty of Waitangi.
- Kemp's Deed.
- Waimakariri District Council Memorandum of Understanding with Te Ngāi Tūāhuriri Rūnanga.
- Mahaanui Iwi Management Plan 2013.
- NZ Coastal Policy Statement 2010 (*Resource Management Act 1991*).
- Regional Coastal Environment Plan for the Canterbury Region (*Resource Management Act 1991*).
- Waimakariri District Council District Plan and proposed District Plan (*Resource Management Act 1991*).
- Waikuku Beach Reserve Management Plan (*Reserves Act 1977*).
- Canterbury Conservation Management Strategy 2016 (*Conservation Act 1987*).
- Environment Canterbury Navigation Safety Bylaws 2016 (*Local Government Act 1974*).
- Estuarine Research Report 38 – impacts of vehicles on juvenile tuatua on Pegasus Bay surf beaches 2010.
- Estuarine Research Report 39 – assessment of intertidal tuatua 2009.

The legislative boundaries map at the end of this section shows the interface between the various rules and policies contained within the Regional Coastal Environment Plan (coastal marine area boundary), the Waimakariri District Council's District Plan (coastal marine area boundary), the Canterbury Conservation Management Strategy (conservation areas), the proposed Ashley/Rakahuri Regional Park Management Plan, the Reserves Act 1977 (local purpose reserves) and the Ngai Tahu Claims Settlement Act 1998 (Fenton Reserves and Entitlements).

There are also other Council bylaws that apply to the coastal area. These include the Waimakariri District Council Dog Control Bylaw 2019 and the Alcohol Control Bylaw 2018. Reference has been made in this bylaw to the relevant clauses in bylaws listed, to prevent coastal users having to research other Council bylaws to find out what rules apply.

Significance of Ashley River/Rakahuri and Saltwater Creek Estuarine Areas

The Ashley River/Rakahuri and associated estuarine areas link up with the 550hectare Tuhaitara Reserve which stretches 10.5 km from the estuary and contains many protected wetlands. This string of wetlands has important values for some special invertebrate and plant communities and combined creates a large area of significant attraction to birdlife, the majority of which are indigenous and regarded as taonga by local iwi. The estuary, with its large areas of tidal mudflats at the conjunction of the Ashley/Rakahuri River and Pacific Ocean, is recognised as one of the best shorebird feeding sites on the South Island's eastern coastline. It is the largest, least modified estuary in Canterbury with a variety of ecosystems and habitats and observations of up to sixty bird species at any visit are common.

The Ashley River/Rakahuri estuarine area is recognised by the International Union for the Conservation of Nature (IUCN) as a wetland of 'international significance'. The *Regional Coastal Environment Plan for the Canterbury Region* lists the Ashley River/Rakahuri and Saltwater Creek Estuary as an area of 'significant natural value with Maori cultural values; wetlands, estuaries, and coastal lagoons; marine mammals and birds; ecosystems, flora and fauna habitats; historic places; and coastal landforms and associated processes' occurring in the area. The Ashley River/Rakahuri Estuary and wider Pegasus Bay wetlands are designated 'Important Bird Areas' by Birdlife International (of which Forest and Bird is the NZ partner) and the threatened native braided river birds breeding on the river are a priority for protection in the *Biodiversity Strategy for the Canterbury Region*. The Department of Conservation rates the area as being of 'significant conservation value' and is the administering body for five Local Purpose Reserves under the *Reserves Act 1977* and two stewardship areas under the *Conservation Act 1987* located in the area. One of these stewardship areas, known as the Conservation Area Pacific Ocean Foreshore, is described by the Department as being a 'priority ecosystem'. The Banks Peninsula Marine Mammal Sanctuary runs up the coastline extending four nautical miles out to sea from the mean high water springs mark.

The estuarine wetlands are the feeding, roosting and breeding grounds of a large number of native birds, including some threatened and critically endangered species such as the black-billed gull (the world's most endangered gull), the black-fronted tern, banded dotterel and wrybill. Wrybill, the only bird in the world with a bill that bends sideways, feed in the estuary and breed upstream in the braided river. The wetlands are an important summer resting and feeding site for a large number of locally resident and migrant wader species. Wrybills, banded dotterels, pied stilts and pied oystercatchers start to pass through in late August with small numbers of other northern hemisphere wading birds arriving in September and staying into April. Godwits also arrive in September to feed and rest after an 11,000 km non-stop trip from Alaska, preparing for their return journey in later March. In winter the Estuary is home to the white heron and very rare black stilt. The area is also an important breeding ground for fish such as flounder and whitebait.

As part of the consultation process, conservation-orientated organisations and bird specialists identified a number of activities that could have a negative impact on the important ecological and wildlife values of the Ashley River/Rakahuri and Saltwater Creek estuarine areas. The need to offer additional protection to this internationally significant area was well supported by submitters to the proposed 2015 Bylaw and the proposed 2016 Bylaw attempts to reduce the tension between environmental protection and recreational use by prohibiting activities that are able to be carried out elsewhere on the beach and restricting other site-specific activities. Examples of prohibited activities that can be carried out in other less ecologically sensitive coastal areas are horse riding, exercising dogs, land yachting, using model aircraft and drones, and taking off or landing microlights and helicopters.

Aerial activities can be seen as a threat to some birds who stay in the air while these are taking place. This interferes with their normal feeding, resting, nesting and roosting activities and puts chicks at risk of overheating or predation.

Since the bylaw was introduced in 2010, dogs were still frequently observed chasing birds and disturbing their nests. In the 2016 review Dogs were prohibited from the estuary, apart from permitted gamebird dogs during the gamebird hunting season, in order to offer greater protection to critically endangered or threatened bird species.

The estuary is the only safe training and self-landing area for kite surfing within the district and this is now a restricted activity, subject to an agreement between the Council, kite surfing community and bird conservation groups.

The bylaw also recognises the significance of the area as a regional sport fishery and provides limited vehicle access via a permit system from mid-August to the end of November each year.

Protection of Foreshore Habitats

The intertidal coastal area is a very important feeding area for birds. Vehicles disturb birds feeding, resting and nesting in built-up areas of driftwood. They also disrupt their food sources by killing or stressing species such as tuatua that live in the sand.

A study of tuatua found that juvenile tuatua were largely found just adjacent to and beneath the high tide line along the beach whilst adult tuatuas were found closer to the low tide line along the beach. Another study found a relationship between the number of vehicle passes and tuatua damage with juvenile tuatua being more at risk from crushing than the larger more mature adults. The compactness of wet sand was also found to favour tuatua survival.

The bylaw offers some protection to tuatua by providing vehicle free areas and attempting to reduce the number of vehicles driving on the rest of the beach. Vehicles are also required to be driven below the high tide mark, apart from at the Waimakariri River Mouth where this is unsafe because of changes in levels along the side of the river. While vehicles driving on wet sand will damage adult tuatua, the more vulnerable juvenile tuatua living higher up the beach will be better protected. The impact of horse hooves on tuatua has been found to be similar to that of vehicles and the equestrian free area at Waikuku offers some protection.

Protection of Dune System

Vehicles and motorcycles in the dunes continue to be a problem, particularly at Waikuku, Pines and Kairaki Beaches, and a number of submitters to the proposed 2015 Bylaw provided the hearing panel with photographic evidence of the damage done to the coastal environment by vehicles and motorcycles. The dunes provide beach settlements with some protection against coastal hazards and damage to the vegetation accelerates coastal erosion. Vehicles have been prohibited from the dunes and motorcycles have been prohibited from the beach altogether to try and address this problem as well as other safety concerns.

Safety Concerns of Beach Users, Conflicts between Different Types of Recreational Activity and Public Nuisance

A number of submitters to the proposed 2015 Bylaw expressed safety concerns about the use of the beach for low key recreation activities such as walking, running, swimming and picnicking at the same time as horse riding, horse training, land yachting, driving and motorcycle riding. The lack of control of some dogs on the beach around other users, particularly children and horses, was also a concern for some people. In one instance, the hearing panel was shown photographic evidence of a vehicle and motorcycle passing through a busy flagged surf patrol area close to a toddler sitting on the beach. Vehicles had been prohibited from the area in question since the bylaw was introduced in 2010. Other submitters had incidences of accidents, near misses and verbal abuse to report.

The bylaw attempts to resolve identified public health, safety and nuisance issues in a way that is no more than reasonably necessary by:

- Giving priority to the most vulnerable beach users, such as children and other people on foot and bathers.
- Designating zones away from the most popular swimming beach (Waikuku Beach) for activities such as recreational horse riding, horse training, land yachting and driving.
- Prohibiting vehicles and horse trainers from passing through flagged surf patrol areas and requiring recreational horse riders to take due care and land yacht operators to dismount if passing through on a return trip is unavoidable.
- Reducing the number of vehicles on the beach by prohibiting recreational driving and motorcycles.
- Clearly setting out personal responsibilities around the use of a vehicle on the beach (the same as on a road) and dog control.
- Requiring the use of the beach for horse training to be in accordance with a user agreement.
- Requiring all beach users to be aware of each other and not impact on another's use or enjoyment of the beach.

Te Ngāi Tūāhuriri Values

Ngāi Tūāhuriri concepts involving land, water and resources are determined by a very complex system of inter-relations and while free to utilise the resources, Ngāi Tūāhuriri are also restrained by a system of controls.

In an economic sense, the resources of an area determined the welfare of the people. The abundance, or lack of, directly affected the mana (prestige) of every tribal group. Traditionally the acquisition and maintenance of the exclusive right to those resources was central to the core of Maori society. The seasonal collection of these resources and the resulting community effort therefore also formed a very important part of the community's strength.

These seasonal activities were a time for Whanaungatanga – renewing contacts with distant relations, Whakatinana o ngā uara – of reinforcing traditional and cultural values, and Tikanga – of maintaining controls; thus providing a tangible link with the past. Another important example of cultural resource values is that of Manaakitanga – hospitality, towards guests. Tradition dictates that as hosts, Tūāhuriri whānau of this area must prepare the best local foods for manuhiri.

Mahinga kai was specifically recognised and protected in Kemp's Deed in 1848 and advanced within Te Kerēme, the Ngāi Tahu Claims Settlement Act 1998. It describes the natural resources gathered by Maori and the places and practices used in doing so. Mahinga kai is an important value and activity that will be acknowledged and provided for within the bylaw process and through ongoing partnership.

The Rakahuri Awa/Ashley River and Northern Pegasus Bay coastal area was a significant area for mahinga kai. Fenton Reserves and Fenton Entitlements were set aside for occupation and access to mahinga kai and some of these are located in or close to the estuary. Fenton Reserve owners and holders of Fenton Entitlements have a legal right to access waterways associated with these reserves and entitlements for mahinga kai purposes. The Ngāi Tahu Claims Settlement Act 1998 makes provision for Fenton Reserve owners and holders of Fenton Entitlements to have access up to 210 days per year for the above purposes, including the erection of temporary camping shelters. In the preparation of this bylaw these rights have been considered and applied.

Traditional values and controls regarding water are included in the Tribe's spiritual beliefs and practices. This recognises and reinforces the absolute importance of water quality and quantity to both mahinga kai and hygiene. Water is held in the highest esteem because the welfare of all life that it contains determines the welfare of the people reliant on those resources.

Traditionally water was the centre of all activity within Maori society. It provided the preferred transport medium, supported fish and shellfish populations and was used in religious ceremonies, including burials, and also for recreational activities. For these reasons and like most other cultures, settlements were centred beside, or in close proximity to major waterways.

This dependence on kai-moana, kai-awa and kai-roto is a subject that has remained constant throughout Ngāi Tūāhuriri history. Over time Ngāi Tūāhuriri accumulated an extensive amount of knowledge about the resources within its' rohe, particularly water-sourced foods. Harvesting methods reflect a sophisticated understanding of the breeding cycles, migration times and feeding habits of all the important fresh and salt-water species, with different names being used for the same fish at different parts of its life-cycle.

Connected to the concept of water guardianship is the matter of tapu. Water was declared tapu for several reasons. The best examples of Wai-Tapu are those waterways that act as burial places. Because of their primary use, food is not taken from these places. One such incident associated with this bylaw area is along the South bank of the Rakahuri, where Te Rauparaha dug up the remains of an elderly Ngai Tuahuriri woman. Subsequently those Tūāhuriri whānau knowledgeable in this history do not gather kai awa from that particular stream and surrounding area.

The Council acknowledges the sensitivity around the scattering of human ashes within the area covered by this bylaw and the concern Te Ngāi Tūāhuriri Runanga has for the impact on cultural values and customs and advises avoiding using mahinga kai areas and associated waterways for this purpose.
