

Suggested additions to Table ECO-2: Threatened and at risk non-vascular plants and lichens recorded or likely to be present in the District (naturally occurring species only).

Scientific Name	Common Name	Conservation Status
Mosses		
<i>Ceratodon purpureus</i>		Threatened – Nationally Critical
<i>Tortula viridipila</i>		Threatened – Nationally Endangered
<i>Bryum pallescens</i>		At Risk – Naturally Uncommon
Liverworts		
<i>Ricciocarpos natans</i>		At Risk - Declining
<i>Chiloscyphus erosus</i>		At Risk – Naturally Uncommon
Lichens		
<i>Cladia inflata</i>		At Risk – Declining
<i>Xanthoparmelia semiviridis</i>		At Risk – Declining
<i>Badimiella pteridophila</i>		At Risk – Naturally Uncommon
<i>Menegazzia aeneofusca</i>		At Risk – Naturally Uncommon
<i>Menegazzia globulifera</i>		At Risk – Naturally Uncommon
<i>Parmeliella gymnocheila</i>		At Risk – Naturally Uncommon

<i>Podostictina ardesiaca</i>		At Risk – Naturally Uncommon
<i>Pseudocyphellaria gretae</i>		At Risk – Naturally Uncommon
<i>Pseudocyphellaria intricata</i>		At Risk – Naturally Uncommon
<i>Pseudocyphellaria lividofusca</i>		At Risk – Naturally Uncommon
