

Definitions Nesting Tables

The relationship between listed defined terms is shown below. Within the table, activities are listed with the more general on the left and the more specific on the right. For example, retail activities is the more general activity which includes food and beverage, large format retail and bars and taverns as more specific activities. Those more specific components may also include more specific activities. Where an activity table for an overlay, zone, district wide or precinct lists a general activity in a nesting table, that general activity includes all of the nested specific activities unless otherwise specified in that activity table.

Where an activity is included in a nesting table, the activity status of that activity in any activity table also applies to the nested activities set out to the right of that activity in the nesting table, unless an activity table expressly provides otherwise for a particular overlay, zone, district wide rule or precinct.
